Re: IDOT Utility Permit Resolution

Bid openings to extend sanitary sewer service to all facilities at Rochelle Municipal Airport will be opened on August 25, 2011. A recommendation to Council is expected for the September 12, 2011 City Council meeting with construction to begin this fall. It will be necessary to extend a portion of the sanitary sewer service within IDOT right of way therefore requiring them to issue a utility permit. IDOT requires all government agencies to pass a resolution prior to issuing the utility permit.

Attached is the required utility permit and resolution for approval by Council. It is my recommendation to approve the resolution so this project can continue to move forward.
