Re: CDAP Grant for True Grit

Project True Grit has been offered a \$300,000.00 Community Development Assistance Program Grant through the Illinois Department of Commerce and Economic Opportunity. This grant is designed to fund the construction of a Waste Water Lift Station that will be required for the further development of the Southeast Industrial Park which includes Project True Grit. This grant along with the CDAP Grant that was awarded with Project e-Rail will fund over ½ of the cost of the lift station. Additional grant funds are being sought for the balance of the funds.

The City Staff recommends that the City Council approve the resolution supporting the Community Development Assistance Program Grant on behalf of Project True Grit for the necessary public utilities projects associated with the construction of a new manufacturing/processing plant in Rochelle.
