Re: 9th Street Production Buildings and Caron Road Peaker Building Asbestos Removal

Please review the attached recommendation from Willette & Hofmann pertaining to the asbestos removal projects at the production facilities.

RAMSCO was the low bidder on this project and has failed to execute the contract due to extra contacts they were working on.

Since this is a time sensitive project, along with Willette & Hofmann, I recommend the second low bidder who is Midwest Service Group of Schereville, Indiana for \$49,950.00.

Willette & Hofmann confirmed that Midwest would honor their bid price and they could mobilize immediately. They also confirmed that they can be completed by December 15, 2012 which will keep us on schedule.

We are reviewing what action we should take with RAMSCO bid bond of 952.50.
