ADDITIONAL PROVISIONS

1. Occasions in which Drake-Scruggs Equipment Inc is to supply the cab and chassis for a customer it shall be invoiced to you upon delivery to Drake-Scruggs Equipment.
2. If, for any reason, delivery is not made within 10 days from the date specified, the cash selling price quoted herein will be subject to adjustment to conform to our regular cash selling price of the goods covered by this proposal in effect at the time of delivery. If the price adjustment results in an increase in price, you shall have the privilege of accepting delivery at the increased price or canceling your acceptance of this proposal by giving written notice of such cancellation to us within 5 days after notice of such price increase is given to you.
3. You agree to accept the goods covered by this proposal, as fulfilled thereof, with such changes in design and materials, or either of them, which we might make.
4. If any sales or excise taxes now in effect, shall be increased, or any new sales, excise, floor or processing taxes shall be imposed by federal, state, or local laws, you are to reimburse us for any and all such increased or new taxes that we may be required to pay or to reimburse to others by reason of the manufacture, purchase or sale of the articles and equipment covered by this proposal. The amount of such increased or new taxes may be billed as a separate item or added to the price of the articles and equipment to which they are applicable at our option.
5. We shall not be responsible for loss, damage, or delays in transportation after shipment, nor for failure to supply any goods covered by this proposal or to deliver the same on time where prevented by strikes, fires, or accidents, or by the demand exceeding the available supply, or by any other cause beyond our reasonable control.
6. Any cost incurred by Drake-Scruggs Equipment, Inc. as a result of either cancellation or change orders shall be passed to the buyer.

*Delivery time is only an estimate. This time may change due to unforeseen problems.

WARRANTY

DRAKE-SCRUGGS EQUIPMENT, INC. Warrants each new article to be free from defects in material and workmanship under normal use and service, its obligation under this warranty being limited to making good any part or parts thereof which shall be returned to it with transportation charges prepaid, and which its examination shall disclose to its satisfaction to have been thus defective, provided that such part or parts shall be so returned to it not later than (90) days after delivery of such article to the original purchaser. This warranty is expressly in lieu of all other warranties expressed or implied and of all other obligations or liabilities on its part, and it neither assumes nor authorizes any other person to assume for it any other liability in connection with the sale of its equipment.

This warranty shall not apply to any article which shall have been repaired or altered outside of its shop in any way so as, in its judgment, to affect its stability, nor which has been subject to misuse, negligence or accident. Warranty on all new equipment is subject to the individual manufacturer as attached.

Your Drake- Scruggs installed equipment is warranted from defects and workmanship for one year from the date of delivery. Included is one free field service trip within this warranty period. Normal travel charges will apply after this initial trip during the one year warranty period. After expiration of the one year warranty, normal travel, labor and material charges will apply. The one year warranty only applies to new components sold and installed by Drake-Scruggs Equipment Inc. Normal maintenance, repairs due to lack of maintenance and equipment transfers from chassis to chassis are not included in this warranty.

Aerial

Versalift SST-40-EIH, Insulated, end mounted 40' telescopic/articulating aerial platform lift.

Aerial Features:

- Platform mounted full pressure Unitrol single-stick control with safety trigger and emergency stop.
- Full pressure turret mounted lower controls including override
- Engine start/stop from platform and lower controls is standard with the aerial unit.
- Three gallon a minute open center system with an operating pressure of 2250 PSI.
- Fiberglass inner boom and patented ELECTROGARD provide 42" insulation gap fully retracted meeting ANSI A92.2-1990 requirements for Category C, 46 KV and below.
- ELECTROGARD and inner boom finished with white urethane paint over white gel coat.
- Multi-link hose carrier system through booms is standard with the aerial unit.
- Non-lube bearings used at all pivot points is standard with the aerial unit.
- Integral hydraulic oil reservoir with dual sight gauges and 12 gallon capacity is standard with the aerial unit.
- Master/slave hydraulic leveling with upper control to tilt for cleanout or rescue.
- White urethane paint is standard with the aerial unit.
- Two (2) operators manuals and two (2) service manuals (in English) is standard with the aerial unit.
- ANSI A92.2-1990 data plate is standard with the aerial unit.
- Tubular rubber platform rest for horizontal stowing is standard with the aerial unit.

TruGuard dielectric isolating system with 4-axis single stick controller.

180 degree platform rotator. (reduces maximum platform capacity by 50lbs.)

Hydraulic tool power at upper controls (throttle control for priority flow control required)

Hydraulic quick disconnects for the tool circuit at the bucket and in the pedestal for diagnostic pressure test.

Stow/unstow at the turret.

Closed 24" X 30" platform with one step to curbside.

Platform cover, nylon /vinyl 24" X 30"

Platform liner for 24" X30" x 42" platform.

Scuff pad 24" x 30" with step.

Fiberglass chain saw holder that mounts to the outside of the platform.

Platform mounted fiberglass pruner holder.

8x19x8 polyethylene tool tray.

Continuous boom rotation.

Manlift platform capacity of 400lbs.

Chassis throttle control with priority flow control.

Emergency 12v DC hydraulic system.

Two-speed 36v DC drive system (required for lifts with hydraulic tool power). Includes standard enclosure, motor, 3 gpm pump, 3 AGM (Absorbed Glass Mat) 215 Ah maintenance free batteries and 120v AC to 36v DC charger (20 amp)

36V DC Battery guage.

Fiber optic system for actuating DC drive units. For lifts with tool power. Provides fiber optic lines through boom including actuators and transceivers.

12v DC to 36v DC charger. Used to charge DC Drive batteries directly from the chassis while the chassis is running.

Idle Control Module (auto engine start) requires 12V DC to 36V battery charger.

Rubberized boom cradle.

20" insulation gap lower boom insert for SST-40.

Full body harness and lanyard (xtra large)

Aerial painted standard white

Rear underframe torsion bar.

Timbren load booster installed on front axle.

Counterweight needed to make aerial unit stable.

PTO and gear pump to power

Manufacturer's recommended amount of hydraulic oil to provide power to the unit.

Electrical power distribution control module installed in chassis cab.

Body

Brand FX model BFXB60DLS fiberglass service body for installation on a 60" cab to axle..

Misc.

Rubber wheel chock 10" L X 8"D X 5" H with handle

5 LB - ABC rated, fire extinguisher (shipped loose).

Vinyl Manual pouch

12 volt back up alarm with a 97 db range

Triangle reflector kit.

Inverter

3000 watt Pure Sine Wave inverter installed in the curbside front vertical compartment on the floor of the compartment.

Weather proof 110 volt outlet installed on the rear face of the rear cubside compartment.

Grounding Reel

Hannay spring rewind grounding reel with 50' of 2/0 cable, clamp on one end of cable, 4 way roller and cable ball stop installed on streetside of tailshelf.

Towing Package

Buyers PH8, medium duty pintle hitch - 8 ton capacity.

ICC bumper with two safety chain D rings.

"D" Rings

Six prong trailer socket installed at the rear of the unit adjacent to the pintle hitch location. (Plug will be wired to industry standard unless otherwise requested by customer)
