**Re:** Community Ice Rink- Central School Prairie

---

Through a collative effort, the City of Rochelle, Flagg-Rochelle Park District and the Rochelle Elementary School District 231 worked together to construct a community ice skating rink for families and children to enjoy throughout the winter season.

An intergovernmental agreement was constructed and reviewed by each governmental entity and approved or will be by respective boards. The agreement covered insurance liabilities and the end date of March 31, 2014 for the ice rink to be sustained.

It is the hopes of this project to create an outdoor activity that promotes family fun, winter activities and governmental collaboration. With this project, we are at the mercy of the weather, but have great hopes of sustaining the ice for a short period of time to learn what works for next year's preparations.
