Re: Sale of Surplus Dewatering Equipment

Dave,

With the dewatering equipment upgrade, RMU replaced 3 Sharples PM 3800 centrifuges. These units are approximately 30 years old and are of no use to the treatment facility. We estimated a scrap value for all three units at \$6000 and also posted on a bidding website for 1 month. No bids were received but I was able to acquire one offer from Ecopac Equipment Inc. for a price of \$12,500. This sale price includes pickup of the equipment by Ecopac and "as is" with no warranty of any kind.

I recommend authorizing the sale of these units in the amount not less than \$12,500.

Adam Lanning,
Superintendent
Water/Water Reclamation
