**Topic: Mightyvine transformers**

Attached is the quote from Wesco for two transformers to serve Mightyvine Phase 2. These two transformers are the same as the two transformers that went into service for Phase 1. Phase 2 of Mightyvine is on a short time frame and because we are ordering the transformers from the same vendor, engineering does not need to be done and will reduce the lead time to meet the time frame of the customer.

It is my recommendation to purchase these two transformers for Phase 2 of Mightyvine, so RMU can have them here to complete the project on the customer's time frame.
