Re: Bucket Truck

Please find the attached Altec Model TA60 aerial device quotation. This quotation is based on the competitively bid National Joint Power Alliance contract 031014-ALT. Municipalities throughout the state of Illinois including the City of Rochelle are currently utilizing the NJPA contract for a broad array of goods and services. Information regarding NJPA purchasing can be found at www.NJPACoop.org. Please feel free to contact Altec Industries NJPA contract manager at any time.

Altec NJPA Contract Manager:

Andy Campbell

It is my recommendation to use NJPA to purchase the truck. The truck being replaced is a 2003 and has been in the shop at least 12 times in the last year. We have been informed that the leveling cables must be replaced and the cost for that alone would be \$10,000-\$15,000. The delivery of the truck would be about 300 days, so this would actually come out of the next budget.
