J. OPEN ACCESS TO DOCUMENTS

(Reference: 49 CFR Part 18.36(i); FAA Order 5100.38)
(Public Act 90-0572 Section 20-65; Public Act 87-991)

The Consultant shall maintain, for a minimum of 5 years after the completion of the contract, adequate books, records, and supporting documents to verify the amounts, recipients, and uses of all disbursements of funds passing in conjunction with the contract; the contract and all books, records, and supporting documents related to the contract shall be available for review and audit by the Auditor General; and the Consultant agrees to cooperate fully with any audit conducted by the Auditor General and to provide full access to all relevant materials. Failure to maintain the books, records, and supporting documents required by this Section shall establish a presumption in favor of the State for the recovery of any funds paid by the State under the contract for which adequate books, records, and supporting documentation are not available to support their purported disbursement.

K. CERTIFICATION OF CAPACITY TO CONTRACT

(Public Act 90-0572, Section 50-13)

It is unlawful for any person holding an elective office in this State, holding a seat in the General Assembly, or appointed to or employed in any of the offices of State government, or who is an officer or employee of the Illinois Building Authority or the Illinois Toll Highway Authority, or who is the wife, husband or minor child of any such person, to have or acquire any contract, or any direct pecuniary interest in any contract therein, whether for stationery, printing, paper or for any services, materials or supplies, which will be wholly or partially satisfied by the payment of funds appropriated by the General Assembly of the State of Illinois or in any contract of the Illinois Building Authority or the Illinois Toll Highway Authority. Payments made for a public aid recipient are not payments pursuant to a contract with the State within the meaning of this Section.

It is unlawful for any firm, partnership, association or corporation in which any such person is entitled to receive more than 7 1/2% of the total distributable income to have or acquire any such contract or direct pecuniary interest therein.

It is unlawful for any firm, partnership, association or corporation in which any such person together with his spouse or minor children is entitled to receive more than 15%, in the aggregate, of the total distributable income to have or acquire any such contract or direct pecuniary interest therein.

Nothing in this Section invalidates the provisions of any bond or other security hereto or hereafter offered for sale or sold by or for the State of Illinois.

This Section does not affect the validity of any contract made between the State and an officer or employee of the State or member of the General Assembly, his spouse, minor child or any combination of such persons, if that contract was in existence before his election or employment as such officer, member, or employee. Such a contract is void, however, if it cannot be completed within 6 months after such officer, member, or employee takes office, or is employed.

This Section does not apply to (1) a contract for personal services as a teacher or school administrator between a member of the General Assembly or his spouse, or a State officer or employee or his or her spouse, and any school district, public community, college district, the University of Illinois, Southern Illinois University or any institution under the control of the Board of Governors of State Colleges and Universities or under the control of the Board of Regents or (2) a contract for personal service of a wholly ministerial character including but not limited to services as a laborer, clerk, typist, stenographer, page, bookkeeper, receptionist or telephone switchboard operator, made by a spouse or minor child of an elective or appointive State officer or employee or of a member of the General Assembly or (3) payments made to a member of the General Assembly, a State officer or employee, his or her spouse or minor child acting as a foster parent, homemaker, advocate, or volunteer for or in behalf of a child or family served by the Department of Children and Family Services.

Any person convicted of a violation of this Section shall be guilty of a business offense and shall be fined not less than \$1,000 nor more than \$5,000.

The appropriate Certification of Capacity to Contract will be executed in Section III.X., of this agreement.

ENGINEERING REPORT (General Guidance)

The Engineering Report is to be prepared by the Consultant and submitted to the Sponsor and/or Department, if possible, prior to starting Plans and Specifications. The Report shall include, at a minimum, a discussion of the following elements which are applicable and any other elements deemed necessary by the Department:

1. Introduction, project overview and consistency with approved ALP, justification, scope, authorization, funding, required environmental actions and schedule.
2. Investigations and evaluations, including pavement history, PCI information, topographic survey data, soil sampling and testing, boring logs, CBR test results, subgrade stabilization considerations, and seasonal frost issues.
3. Pavement design considerations, including pavement types and/or alternates; any unusual design and reasons therefore, selection of design CBR value, traffic distribution, and reported pavement strength.
4. Rehabilitation, strengthening and/or overlay work shall be detailed as to the type of work required, including existing pavement conditions, material selection considerations, thickness design and economic analysis.
5. Construction features which vary from FAA criteria should be identified including the problem(s) facts, alternative solutions, and/ or desired solution. Is the desired solution the most economical?
6. Items such as materials sources, soils, drainage, water for construction, cost of land vs. development, contractor resources, available finances, and stage development. The report should say how these factors affected the decisions made by the Consultant in the design.
7. Explanation of drainage design criteria including explanation of drainage districts data iNPUT and off-site drainage impact on design. Include drainage calculations and modeling.
8. Special considerations for local circumstances such as available material, equipment, contractors, and airport sponsored events.
9. Consultant's choice of options for the lighting design; similar explanation of choices made for the drainage, fencing, turfing and marking, including decisions regarding cover crop seeding.
10. Approach conditions which will result from proposed work and comparison with FAA criteria.
11. Analysis of potential RSA determination (if applicable).
12. Development of PCN for runway strengthening and rehabilitation projects.
13. Description of non-AIP work and quantity separation from AIP eligible items.
14. Identify work to be done by others such as utility companies and airports sponsor forces.
15. The Consultant's preliminary estimate of construction costs, fees and expenses shall be included.
16. A discussion of project safety concerns (per guidance explained in FAA AC 150/5370-2E (or current) Operational Safety on Airports during Construction) shall be included.
17. A discussion of project phasing / sequencing and estimate of construction calendar days shall be included.

OP&P PROGRAM LETTER

Illinois Department of Transportation

Office of Planning and Programming
2300 South Dirksen Parkway / Springfield, Illinois / 62764

April 22, 2010

Mr. Don Elliott
Manager
Rochelle Municipal Airport
420 North 6th Street
City Hall, Box A
Rochelle, Illinois 61068-1540

Dear Mr. Elliott:

Following, for your information, are the federally funded projects for your airport that are included in the Illinois Department of Transportation's Federal Fiscal Year (FFY) 2011 Proposed Airport Improvement Program. This program is based on federal funding levels established in FFY 2010 which provide for a minimum of \$1 million in entitlement funds for primary airports as well as \$150,000 entitlements for general aviation airports.

At this time, there is not a bill for FFY 2011 federal funding. Federal legislation could possibly change the levels of G.A. entitlement as well as change the federal match percentage. This program assumes that both will be the same as in FFY 2010. If there are changes in these, we may need to redo the program. The program that we are sending out now assumes that the \$150,000 will be available to eligible non-primary airports. It is not clear now when there will be a final federal bill. Should it become necessary for us to revise your program, we will notify you as soon as possible.

The projects included in the program were selected from the many projects that were submitted as the result of the fall 2009 TIPS meetings. Federal, state and local priorities weighed heavily in the selection process.

The FFY 2010 and prior program contains the following federal projects for your airport:

Drainage study	Entitlement	\$59,000
	State Apportionment	\$0
	Discretionary	\$0
	State Match	\$1,552
	Local Match	\$1,553
	Total	\$62,105
Advance plans for runway extension	Entitlement	\$108,642
	State Apportionment	\$0
	Discretionary	\$0
	State Match	\$2,859
	Local Match	\$2,859
	Total	\$114,360

The FFY 2011 program contains the following federal projects for your airport:

Construct electrical vault in preparation for the new electrical equipment associated with the runway extension and overall expansion of the airport	Entitlement	\$277,858
	State Apportionment	\$30,892
	Discretionary	\$0
	State Match	\$8,125
	Local Match	\$8,125
	Total	\$325,000

The projects contained in this letter are officially programmed for development. This letter herewith constitutes the official "notice to proceed" for these projects. It is now the airport sponsor's responsibility to initiate the professional services phase of the project for your specific project type (planning development, equipment procurement, T-hangar development, land acquisition or design plans and specifications development). This is accomplished by contacting the Division of Aeronautics, either directly or through your consultant, to schedule a project kick-off meeting. Where construction projects are programmed, you should contact the Division of Aeronautics' design engineer for your airport to initiate a pre-design meeting.

The Division of Aeronautics maintains a letting schedule for construction projects that needs to be strictly followed to ensure that projects are advertised and brought to letting in an organized manner within the fiscal year in which they are programmed. The schedule allows for 30 weeks to develop a project from the date of the pre-design meeting to the letting.

As you may be aware, beginning in FFY 2004, the Federal Aviation Administration has increased the maximum share of federally funded projects from 90 percent to 95 percent. As a result, the state and local match of these projects has been reduced from 5 percent to 2.5 percent through FFY 2010. The FFY 2011 projects as programmed assume that the federal participation will remain at 95 percent. However, the possibility exists that it will be changed back to 90 percent. If this happens, we will notify the sponsors as soon as possible.

If you have any questions concerning the program, please contact Mike McCue at 217-782-0698.

Sincerely,

Charles J. Ingersoll, P.E.
Acting Director
