To: Dave Plyman
From: Dan Westin
Date: March 9th 2016
Re: Skid Load 6 MW Generators Project – Transformer

Recommended Action:

Purchase of project component for 3 * 2 MW Skid Load Generators.

Please place on Council agenda for March 14th 2016.

History and Facts:

Council approved the overall project for 6 MW of additional peak shaving generation in its October 27th meeting. This item is a component of the already presented project total.

Discussion:

RMU staff, Altorfer and BHMG have created a project for these generators which includes a highly efficient integration into RMU's distribution network with a large amount of reuse of the initial skid load project.

This recommendation is for executing the purchase of the following for the gen sets so they can be readied for implementation into the overall project in the spring of 2016:

- Purchase of Transformer: \$ 24,210

Competitive bids were received and the chosen vendor provided both short lead time and lowest price.

Only one transformer needs to be purchased. The two others are in stock.

Funds for the units are in the budget as part of the transmission line upgrade which is now moved out of FY16 and the rest coming from the DIE account.

Recommendation: Approve Purchase and Payment of above project component for the 3*2 MW skid load generators
