

# Rochelle Municipal Utilities

## Utilities Business Management and Energy Production

Memo

**To:** Dave Plyman  
**From:** Dan Westin  
**Date:** March 21st 2015  
**Re:** Skid Load 6 MW Generators Project Phase II – Additional Project Components

### **Recommended Action:**

Consider Purchase of project components for 3 \* 2 MW Skid Load Generators.  
See enclosed quote from Altorfer, BHMG and permit application fee from IEPA.

Please place on Council agenda for March 28th 2016.

### **History and Facts:**

Council approved the overall project for 6 MW of additional peak shaving generation in its October 27<sup>th</sup> meeting. These items are components of the already presented project total.

### **Discussion:**

RMU staff, Altorfer and BHMG have created a project for these generators which includes a highly efficient integration into RMU's distribution network with a large amount of reuse of the initial skid load project.

This recommendation is for executing the purchase of the following for the gen sets so they can be readied for implementation into the overall project in the spring of 2016:

- Fuel Tank: \$ 15,491.14
- Additional work on the units for readiness per Altorfer Quote change order 2: \$ 26,847.00

The change order also includes a higher level of warranty which includes all components.

Funds for the units are in the budget as part of the transmission line upgrade which is now moved out of FY16 and the rest coming from the DIE account.

**Recommendation:** Approve Purchase and Payment of above project components for the 3\*2 MW skidload generators phase II
