Mr. Dan Westin
Director Utilities Business Management and Energy Production
Rochelle Municipal Utilities
700 West Second Street
Rochelle, IL 61068

Ref: 1620 – Generator Installation
Fuel System Installation Recommendation

Dear Mr. Westin:

On behalf of the client, BHMG received electronic email proposals on March 29, 2016 for the Fuel Storage System Installation, a part of the Generator Installation project. A total of two (2) proposals were received and have been reviewed for completeness and ability to meet specification requirements.

The proposal from Independent Mechanical Industries was the apparent low at \$45,067.00, no exceptions were listed. Independent Mechanical has a good list of reference completed projects, and completed in the first phase of the generation projects. The company appears to be in good standing and employs certified and trained craftsmen.

The low proposal for the project is accordance with the Engineer's estimate for the contract. Therefore it is the recommendation of BHMG to award the project to Independent Mechanical, for the installation of the fuel system.

Should you have any questions concerning the proposals or the project, please do not hesitate to contact us.

Sincerely:

BHMG Engineers, Inc.
