BHMG Engineers, Inc.

Reference: Rochelle Municipal Utilities
Quote: PM-WEC-2016-6043

Lucas,

Thank you for the opportunity to quote the above referenced project. We propose to furnish all necessary labor, equipment, materials and supervision to complete the scope of work that is outlined below.

SCOPE OF WORK:

- The City of Rochelle is requesting proposals for the installation of conduit/cable for a project. We have attached two drawings showing the scope of work.
- Scope of work on these drawings will be Notes 4, 5, 6, and 8 on E-2 and Conduits/cables for C1-C12 on E-3. This will include providing/installing all of the conduit and cable. Terminations will be by others.
- There is no major excavation work required for this project as the civil contractor will complete this work. The electrical contractor will be required to work closely with the civil contractor on scheduling as this project is very high priority. This project will require two mobilizations based on the planned work schedule.
- As for the schedule request, based on the scope I see no problem working direct with excavation as they open trenches we will follow right behind to install conduits and he can then backfill. So our completion date will be based on the excavators time line. I see no more than a week's work to install all conduit. We would then come back once all has been finalized and pull cable, maybe three days then.

ASSUMPTIONS / CLARIFICATIONS:

- Electrical permit not included
- All work based on M-F, 7:00am-3:30pm
- Quote valid for 30 days

We appreciate the opportunity to quote this project.

Base bid quote---\$23,295.00

Sincerely:

Paul Maffioli
